Reduce Filtration Costs with PowerLOFT®

- Outstanding Dirt Holding Capacity
- Long Filter Life
- Superior Efficiency
- High Strength.
- Dual Density Construction
- Good Chemical Resistance
- High Bulk - Increased Void Volume
- Thermally Bonded

Powerloft's gradient density allows small particles to be captured deep within the web while larger particles are captured closer to the surface and only the very largest particles are captured on the surface. Debris is captured throughout Powerloft® providing long filter cycles, good clarity, and lower operating costs.

8255
2.5 oz

Powerloft® is ideal for filtering coolants used in metal machining, grinding, drilling, honing, lapping and polishing. And any time the filter is undersized.

Filter cycles are often more than 5 times and often 10 times that of standard media.
